

VORSTEINER M3 TITANIUM EXHAUST

Designed for the M3 E92 Coupe & M3 E90 Sedan models, this fully custom built exhaust system features 100% full titanium construction to maximize power to weight ratio and complement our lightweight carbon fiber aerodynamics.

The all-new titanium exhaust system is a direct result of countless hours of engineering, prototyping and testing before a working model was approved & released for full scale production.

The entire exhaust system saves a total of 38 lbs (16.8 kg) off the stainless steel factory unit while improving both horsepower & torque by allowing more efficient air flow travel while reducing back pressure.

Introducing a totally advanced and unparalleled quality of Vorsteiner Titanium Exhaust.

Product Data:

- + Full Titanium cat back performance system
- + Peak Horsepower Gains: 14hp
- + Peak Torque Gains: 13.23 lb/ft
- + Titanium 90mm tips with optional Blue Torched Finish
- + Extreme weight savings 17 lbs vs. 55 lbs (Factory Stainless Unit)
- + Factory bolt-on fitment with no modifications required
- + Sporty Formula 1 car tone with deeper tone & no interior drone
- + Distinctive Titanium sound characteristics
- + Vorsteiner Laser etched Logo on Tips with adjustable settings
- + Vorsteiner Limited production computer serial number stamping for authenticity

Test Information:
Dynojet 248C
Fuel - CA91 (reformulated)
SAE correction

Perfection Redefined.
